

Crazyflie Expansion  
Left side

Crazyflie Expansion  
Right side

Please note the following about the Crazyflie expansion connectors:  
 \* VCOM is always on power directly from the battery/USB and is not regulated  
 \* VCC is only on when the system is on and is regulated to 3V  
 \* VUSB is connected directly to the USB which means this will supply at 4.5–5.5V when the USB is connected and can be used for charging the battery when the USB is not connected
